

Internet Access Service

What kind of Internet access service would you choose? One that offers unlimited usage, is cost effective, fast and reliable, or one that offers restricted usage, is slow and more expensive?

Benefit from a cost-effective and efficient service

When you contract bluArc for your business phone you also receive its Internet access service. It's cost effective, reducing your monthly expenses; and it's efficient, consolidating your services with a single vendor instead of multiple vendors.

Surf, chat and email in seconds

bluArc's Internet Access Service allows you to integrate voice and data over a single broadband connection while still ensuring quality of service and clarity of voice. With a broadband connection you'll be able to enjoy an extremely fast connection whenever you need one. Within seconds, you'll be surfing, chatting, or emailing.

Receive unlimited usage

With bluArc Internet access you won't have to be concerned with monitoring your usage whether you're using one gigabyte (GB) a month or more than two hundred. You'll receive unlimited usage with no ceiling. You can email your latest marketing campaign to a hundred customers or thousands of customers.

Call us. We can provide the fast, reliable Internet access that your business needs.
